

## Be a leader in hybrid medical education.

### Who We Are

OnlineMedEd delivers a comprehensive, longitudinal, medical curriculum that asynchronously complements in-person learning. Through thoughtful course design and our PACE educational paradigm (Prime, Acquire, Challenge, Enforce), OnlineMedEd communicates information across multiple modalities, but via a single unified voice. This enhances the delivery of medical information and improves the learner experience – from the first year DO student all the way to a practicing provider.

### Testimonial

“I think it helps round out our clinical curriculum. Students use it for studying at the end of their rotation, exams, and studying for their board. Our students do well and this is a solid part of the curriculum that we provide.”

#### Kay Kalousek, DO, MS

Professor at WesternU of Health Sciences College of Osteopathic Medicine of the Pacific

#### Maximize Learner Performance

Prepare excellent practitioners while developing mastery on tests, during rounds, and in-practice situations.

#### Deliver Hybrid Instruction

Don't simply mirror the classroom online – augment learning with a companion to in-person instruction.

#### Empower Faculty

Faculty can deliver high-value content based on their experience without sacrificing course prep, research, or writing time.

#### Institutional Success Team

Our team of peer educators ensures that our content, programs, and processes meet the highest standards and align with best practices.

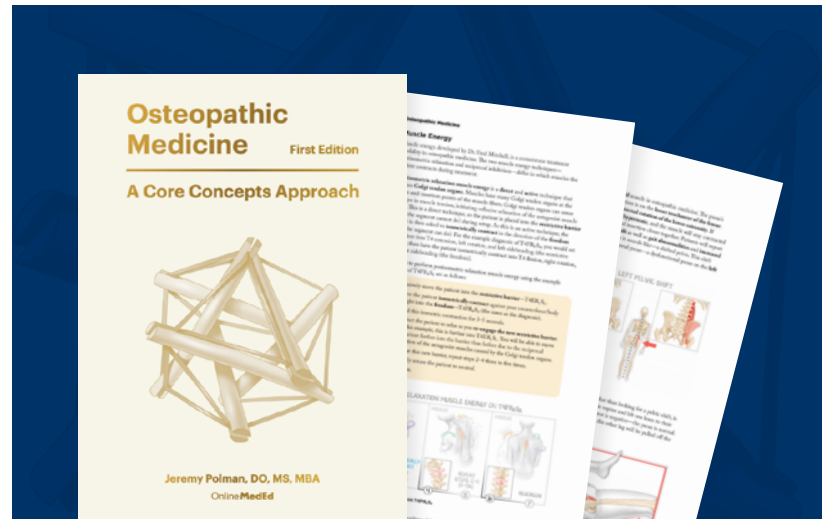

# OnlineMedEd

## DO Solutions

## Osteopathic Medicine: A Core Concepts Approach

Dr. Jeremy Polman authored the definitive guide to reframe osteopathic education. With its learner-centered approach, this gamechanging new book optimizes comprehension by building around core concepts.

### Curriculum Mapping

Learn more about how OnlineMedEd's curricula, tools, and other resources can help programs and institutions meet essential COCA and NBOME requirements.

### A Focus on the Fundamentals

We have created a dedicated OMM curriculum that is challenging and engaging as it covers the foundational elements of key topics. When used to complement in-person education, faculty can share the depth of their experience and go beyond the basics.

### The Value of Practice

At OnlineMedEd, we help you think holistically by focusing on the value and meaning of your practice; not just rote diagnostic approaches or a one-size-fits-all methodology.

### A Powerful Tool in the Toolkit

With a focus on the physical exam and a curriculum that combines technical knowledge with osteopathic techniques, materials from OnlineMedEd encourage learners to think beyond lab tests and X-rays and reinforce value-based care.
