

# Our Institutional Success Team

OnlineMedEd has been empowering students to understand, retain, and apply medical knowledge for nearly a decade. Now, our Institutional Success Team is helping schools and faculty implement OnlineMedEd within their robust medical education curricula.

**Where unmatched content meets unmatched support.**

Design & Assessment

## We offer:

### Tailored Solutions

Our team will meet with your institution's leadership and faculty to truly understand pain points and to ensure we deliver solutions that meet your needs, whether the need be for supplemental resources, remediation tools, or content that fully integrates into new/existing curricula – we help identify the right resources, at the right moment, for your needs.

### Customized Implementations

Following a tried-and-true yet highly flexible implementation roadmap, we walk with you step-by-step as together we implement hybrid resources that meet your institution's, faculties', and learners' distinctive needs.

### Robust Support

With 100+ combined years' experience in academic medicine, hospital medical education, regional medical campus administration, PA, UME (MD and DO), GME, and CE our Institutional Success Team is uniquely-equipped to support your needs throughout the partnership process, to answer questions, and to collaborate with you as we extend our impact through research and development.

## Our areas of expertise include:

- Integrating blended learning into preclinical curricula
- Integrating blended learning into clinical curricula
- Faculty development
- Osteopathic manipulative medicine (OMM)
- Diversity, equity, and inclusion
- Graduate medical education
- Assessment and remediation
- PA education
- Curriculum management
