

## Be a leader in medical education.

OnlineMedEd illustrations are created under the direction of medical educators and composed by our world-class medical illustrators.

### Who We Are

OnlineMedEd delivers a longitudinal integrated curriculum with 500+ lessons to provide what the learner needs to know, when they need to know it. Our storytelling methodology combined with our comprehensive, multi-modal learning platform provides students with written, visual, self-assessment, and reinforcement resource to transform learning to knowledge. OnlineMedEd doesn't just focus on what students learn, but an approach to how they learn best.

**“You can free your faculty to be true educators in the classroom so that they can do active learning, apply the information that’s learned through OnlineMedEd – and expand on it.”**

**Nancy Hayes, Ph.D.**

Florida State University Associate Professor,  
Director of Clinical Foundations

#### Accelerated Learning

Support the efficient acquisition of long-term knowledge through the OnlineMedEd approach, built using evidence-based practices and with learner centered curriculum design.

#### Mastery over Memorization

Helps learners master knowledge and skills with less effort, enabling them to focus on what it means to be a great physician.

#### Continuity of Curriculum

Provides a solid foundation of core knowledge for faculty to build upon, and closes any gaps during experiential learning.

## Medical Education Solutions

### MD Programs

OnlineMedEd is a 4-year longitudinal curriculum that extends from the first day of MS 1 to the transition to residency. We support the preclinical and clinical phases with a dynamic, asynchronous learning platform that can integrate into your basic sciences and clinical curricula, and ultimately prepare learners for the transition to residency.

### DO Programs

OnlineMedEd understands the unique needs of the osteopathic medical education community. Our curriculum extends from OMS1–OMS4 and the transition to residency. Our DO partners can also access our OMM curriculum as well as *Osteopathic Medicine: A Core Concepts Approach*, our innovative OMM textbook with companion OMT videos.

### PA Programs

Our PA curriculum prepares learners throughout their PA education journey for classroom and clinical success, essential assessments, and transition to their first clinical position. In this way, PA programs can deliver a powerful education and eliminate the friction and waste in the current model by aligning the needs of the institutions, faculty, and students.

#### Balance Professional Workload

Give faculty proven curricular resources so they can allocate their time and efforts to developing meaningful learning activities or to professional responsibilities like patient care and research.

#### Accelerate Time to Mastery

Teach learners what they need to know, so educators can facilitate development of the skills and attitudes required to be a great physician.

#### Consistent Learning Experience

Provide a comparable educational experience across multiple clinical sites to meet accreditation requirements.

#### Attainable Results

Partner with OnlineMedEd's faculty peer experts to streamline adoption of the curriculum, engage in faculty development, and evaluate outcomes.
