

Be a leader in hybrid medical education.

Who We Are

OnlineMedEd delivers a comprehensive, longitudinal, medical curriculum that asynchronously complements in-person learning. Through thoughtful course design and our PACE educational paradigm (Prime, Acquire, Challenge, Enforce), OnlineMedEd communicates information across multiple modalities, but via a single unified voice. This enhances the delivery of medical information and improves the learner experience – from the first year PA student all the way to a practicing provider.

Testimonial

“It focuses on the clinical year, but it also provides support for the core didactic foundational concepts either in the systems or some of the task areas that the PANCE focuses on.”

Tosi Gilford, MD, PA-C

Program Director at University of Alabama at Birmingham School of Health Professions

Maximize Learner Performance

Prepare excellent practitioners while developing mastery on tests, during rounds, and in-practice situations.

Deliver Hybrid Instruction

Don't simply mirror the classroom online – augment learning with a companion to in-person instruction.

Empower Faculty

Faculty can deliver high-value content based on their experience without sacrificing course prep, research, or writing time.

Institutional Success Team

Our team of peer educators ensures that our content, programs, and processes meet the highest standards and align with best practices.

PA Solutions

OnlineMedEd exists to elevate healthcare education to create better providers, not just better test takers. We create online learning solutions that enable institutions to complement in-person education to impart medical knowledge and its application. In this way, PA programs can deliver on the promise of a powerful hybrid education that eliminates the friction and waste in the current model by aligning the needs of the institutions, faculty, and the students.

Meeting Common Requirements

Learn more about how OnlineMedEd's curricula, tools and other resources can help programs and institutions meet essential ARC-PA requirements.

One Comprehensive Solution

With OnlineMedEd, we consolidate unrelated, supplemental resources into one comprehensive online learning and test prep platform to simplify preparation and ensure consistency.

Exam Preparation

PA students can leverage curated notes, video lessons, boards-style questions, and flashcards to prepare for the End of Rotation Exams and PANCE more efficiently and confidently.

Aligned Curriculum

We deliver curriculum that's ready to go with topics mapped to academic requirements and course topics, freeing faculty from excessive preparation and enabling the design of active learning sessions.

Remediation

Engage off-course students with focused, timely, and structured content to improve performance and ensure students are able to meet designated requirements.
